

This house WAS very uncomfortable, cold spots and variable temperature from room to room. Are instillation was done on 1-4-2010; this house is now very cozy and comfortable. We have not had to turn on the Heat Pump or cover up with a blanket in the evenings while watching TV one time sense that date. We have been very comfortable just using the wood stove.

Your policy of calling if the appointment time was going to be late was much appreciated also giving a heads up that the instillation crew was on the way.

The gentlemen who have been to the house were neat, polite, friendly and very businesslike. Shawn was a pleasure, and it was clear to my husband and I that he believes in the product and is very proud of the company he is working for.

Dustin and Skyler were well groomed polite no nonsense workers. They were very neat and readily answered any and all of our questions. Your companies clean up policy was much appreciated. We are so pleased with the service we received we have recommended you to several of our neighbors and friends. I believe our friend Tom Akins of Vale has contacted you.

Deciding to spend several Thousands of dollars in this economy was not easy, but I have to tell you as hard as it was to part with the money, we could not be happier with the change it has made in our comfort. We expect to experience good results this summer as well. We are also anticipating savings on our power bill..

One last note it was reassuring to find out you do background searches and drug tests on your employees

Sincerely Stephen and Judy
